

*Enhanced weather protection
means higher sales for your outside catering*

With weinor's versatile systems,
you can extend your catering season –
ideal solutions for any catering use

A beautiful space in the open – a crowd-puller for your guests

Sitting outside evokes memories of holidays gone by. It is the perfect invitation for your guests to stay a little longer and adds to your sales

Benefit from the trend towards being in the fresh air and raise your sales by using weinor's patio solutions – with sun, wind and rain protection as well as intelligent accessories. Increase your catering area by adding an enticing patio and use your outside catering services all year round. It can be cheaper than you think. Whether it is awnings, patio roofs or conservatories – weinor provides a variety of tailor-made solutions that fit your needs. Not just the smokers will be grateful for the new space!

*Comfort through remote control
You or your staff can adjust shade, heating and light with the comfort of a remote control.*

Light up your outside catering

The energy-efficient halogen spotlights in the Light Bar Lux or Lux Design produce a pleasant light and can also be dimmed. The weatherproof housing has been designed for year-round use. The light bars can also be easily retrofitted.

Exceptional electricity savings – cosy warmth through infrared heating

Tempura patio heating – round-the-clock heat

- maximum heating output from an ultra-slim housing
- high efficiency thanks to infrared short-wave radiant heaters
- swivel heating feature allows you to pinpoint where to heat
- splash protection makes it suitable for use indoors and outdoors
- housing only heats up slightly
- available in 200 RAL colours
- easy to retrofit

Heating systems compared – Tempura is unbeatable

- running costs for standard freestanding heaters approx. € 1.30 per hour
- running costs for Tempura only € 0.24 € per hour (electricity tariff: € 0.16/kWh)
- comparison with electric quartz radiators or fan heaters: the electromagnetic waves emanated from the Tempura only warm the skin, not the air between
- maximum thermal radiation just one second after switching on
- no problems with long heating-up periods, cumbersome gas cylinders or limited space caused by the heating mantle itself being too hot.

Attractive and flexible – textile sun protection for outdoor spaces

Anyone using public spaces for outside catering needs to have flexible shading which can be dismantled whenever necessary.

Pleasant atmosphere
Heat and light create a cosy atmosphere under the weinor Duofix shade roofing. Your guests will then be more than happy to sit longer even when it turns dark and a little cooler outside.

The weinor Duofix shade roofing – free-standing and cosy

As a beer tent or shading for sizeable social gatherings, the **weinor Duofix** textile shade roofing is the perfect solution. The free-standing structure can be fitted with awnings to the left and right. These can be extended and retracted independently at will.

weinor Duofix creates a cosy atmosphere and shades your guests from glaring sunlight. Simply open the awnings using the remote control to provide a space in the open. The removable stone bases give the structure its sturdiness and flexibility. This design allows you to set up your shade roofing wherever it is needed.

The Opal Design Lux cassette awning – ideal for shading your terrace area

With its generous dimensions and integrated lighting, the **Opal Design Lux** motorised cassette awning provides your guests with a snug area in the open. A coupled unit is capable of shading widths of up to 12 m. At the same time, the jockey cover ensures protection from the sun at all times. The awning

retains the warmth on the patio over a long time and makes for a cosy environment in the evenings. The extra-tension arm ensures that the awning cloth always remains taut. The patented tilting arm member safeguards the awning from gusts of wind from below.

The Paravento textile side screen – sun, glare and wind protection

*On request, you can also order a **Paravento** textile side screen – for sun and glare protection. Two casing brackets are all that is needed to attach the **Paravento**. The fabric is safely housed in the casing and can be opened or retracted as required. The entire cassette can be easily dismantled in winter.*

The large Lugano sunshade – ideal for large areas

The large **Lugano** sunshade creates a sheltered atmospheric area for up to 25 people – even in windy conditions or when it's raining. Heat is provided by the patio heating **Tempura**. The XXL sunshade is available as an octagon or square. Coupled units are also possible.

Top advertising

Use the sunshade for eye-catching advertising. The signage at the top of the sunshade can be seen from a great distance!

Securely installed

The stone base makes for flexible installation. With a choice between 190 and 240 kg, the base is definitely a heavyweight.

Sturdy roofing and conservatories – weather protection on owned or leased property

With a textile weather roof, glazed patio roof or conservatory as well as matching side elements, you can extend the season anytime you like!

The Terrazza patio roof offers optimum weather protection from springtime until well into the autumn

The weinor patio roof **Terrazza** is the ideal means of protection from unexpected downpours. With a maximum width of 10.5 and depth of 6 m, the **Terrazza L** can provide plenty of room for outdoor catering. The daintier **Terrazza S** is suited to depths of up to 3 m.

For extra protection from the rain, we recommend the **Terrazza L-E** with a roof overhang of up to 1 m. Whether a pent roof, trapezium roof or gable roof – you choose the style of roof that best meets your needs. Matching shading protects you from sunlight and shelters you from curious onlookers.

weinor Plaza Pro and weinor Plaza Home – textile protection from wind and the elements

The **weinor Plaza Pro** textile roof with side posts and the daintier **weinor Plaza Home** provide ways to create rooms. From open to fully closed, weinor's patent-pending **Plaza Pro** is cleverly convertible using a wide variety of side elements. The structure,

which comprises tried-and-tested components, enables great depths to be created regardless of how wide the unit is and also protects against the sun, rain (applies to pitches upwards of 14°) and gusts of wind from below.

▲ Parapet elements with filled perforated sheeting or made of other materials are an excellent way of creating an enclosed space with the cosy atmosphere of **weinor Plaza Pro**. Choose from a wide range of options.

The weinor conservatory – a light-filled room all year round

The ideal solution for a generous, bright extension: weinor's **Vivienda** conservatory builds on to your locality to provide a magnificent fully-fledged room – up to

10.5 m in width and 5 m in depth. The glass fronts on the weinor conservatory offer your guests a highly desirable light-filled space.

Flexible side glass elements for patio roofs and conservatories
 The fronts can be easily opened when the weather is fine. Choose from a wide selection of possibilities to suit your requirements.

An abundance of shapes and functions – side elements, roofing styles and shading

The right shading for all forms of weather protection

The **Sottezza** conservatory awning is fitted under the roof and offers pleasant shade for your patio roof. This awning is suitable above all for well ventilated spaces.

A roof mounted conservatory awning from the **WGM** range will provide your guests with the perfect form of protection against heat build-up. This addition will ensure that the temperature is always pleasant in a conservatory with enclosed side elements.

The **VertiTex** and **Aruba** vertical awnings provide ideal protection from the sun's

rays and shelter you from curious onlookers. Combined with the high-tech Soltis® cloth, which is transparent on the inside, the **VertiTex** ensures you can always see what is going on outside. Additional shelter from the weather and curious onlookers is available in the shape of the **Paravento**, an attractive pull-out sight screen.

React to any type of weather and make it easy on your staff: the weiTRonic weather sensors
 weinor weather sensors control your awnings without you having to do a thing. They automatically open the awning when the sun comes out and retract it when it starts to rain. Instead of having to manage your accessories, you can spend time catering to your guests' needs.

Use your awning as an advertising space

Nowhere is permanent advertising on a large area as inexpensive as on your awning, your sunshade or your vertical awning. Simply print your advertising on the awning or sunshade. Make the name of your business even more prominent or advertise for a cooperation partner such as a well-known drinks producer. You will not only find people taking notice but also set yourself apart from the competition.

Hightech polyester fabrics

WeiTex polyester fabrics are especially suited to the catering trade. Benefits:

- ideal for large units due to their high fabric stability
 - minimal wrinkling and creasing
 - high UV resistance
 - long-lasting brilliant colour
- You can also choose from over 140 acrylic fabric patterns from our **moments** collection.

Huge selection of colours

Exclusively available from weinor: choose from any of 47 standard frame colours, 8 scratch-resistant and dirt-repellent trendy conservatory colours (5% surcharge) as well as a further 200 special RAL colours for your outdoor catering requirements.

▲ weinor patio roofs

We offer the very highest quality weinor puts a lot of emphasis on quality, from the design and materials to workmanship, mounting and service to ensure that you can enjoy your product for many years to come.

▲ weinor awnings

Outside catering all year long

▲ weinor conservatories

Offer your guests a pleasant place to stay in the open air – using weinor awnings, patio roofs and conservatories

Heating, lighting, a smart remote control unit and much more all add to your comfort. As an experienced awning and patio roof specialist, your weinor dealer will help you throughout the process, from providing you with advice to planning and completion. That way you stay on the safe side at all times.

Important Informations:

Creases can form in the fabric and when folding the awning cloth. That can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the fabric in the areas of the seam, border and panels can be caused by multiple layers of fabric and different diameters of rolled up fabric. The stresses in the fabric caused by this can lead to rippling (e.g. waffle or fishbone shapes). This is normal to differing degrees with nearly all awning fabrics. Creases and folds in the fabric do not reduce the awning's value or its suitability for its purpose. Awnings and conservatory blinds are for

protection from the sun and should be rolled up in rain and strong winds. Wet fabric creases more easily and as far as possible should only be retracted after drying out (please take care in strong winds and avoid the formation of puddles). Depending on the colour of the ordered frame we supply all small parts as well as crank handles and drives for units with crank mechanisms in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

We reserve the right to make technical changes. For technical reasons the colours may appear slightly different in print.
